

B – COMPLEX

Analysis: Project area

Legend

- Administration/ Offices
- Housing/ Residential area
- Railroad
- Green space
- Traffic lines
- Shops in the ground floor
- Valley
- Visual connection
- Physical connection

Analysis of current public/private space

Green public space

Private green space

Unaccessible green space

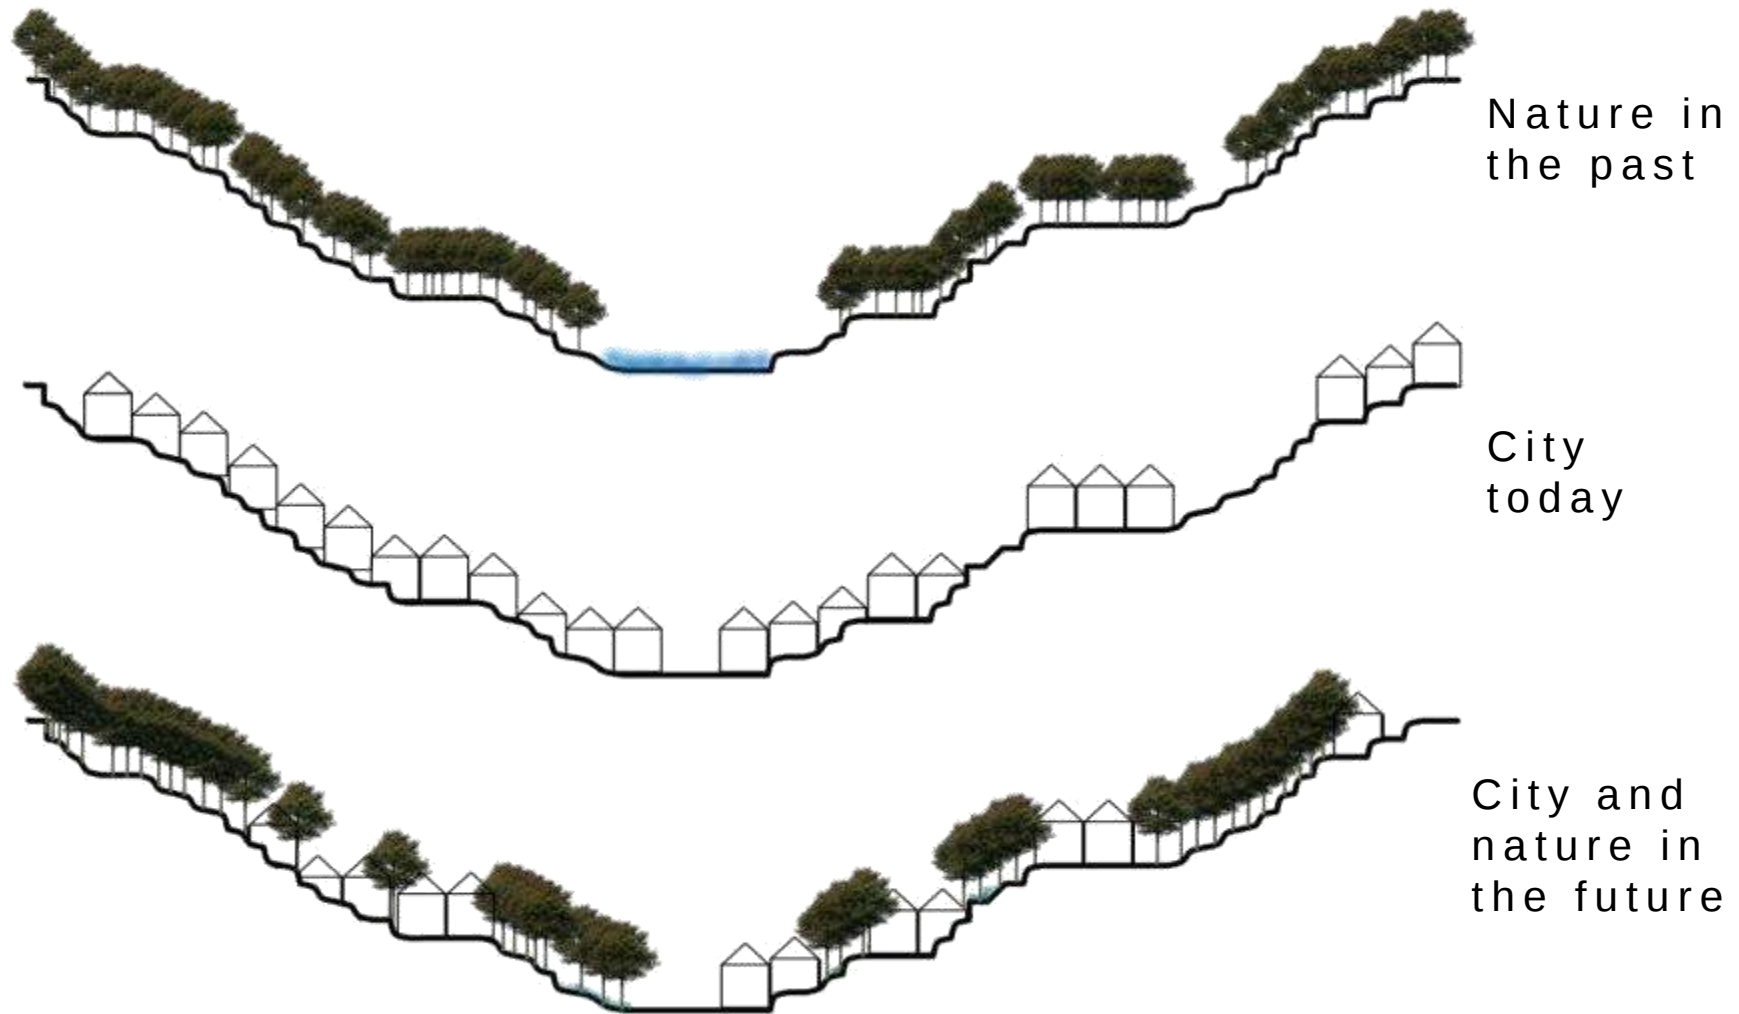

square

SWOT

<u>Strenght</u> • a lot of green • topography • lakes	<u>Weakness</u> • disconnected green spaces • disconnecting rail road • dangerous
<u>Opportunities</u> • connecting the valley and the green spaces while covering the train with green public space • floorscaping lights • car free zones / streets	<u>Treat</u> • high costs for the NMBS

Concept 1: Bring back the valley

Concept 2: Connecting the green spaces

Masterplan

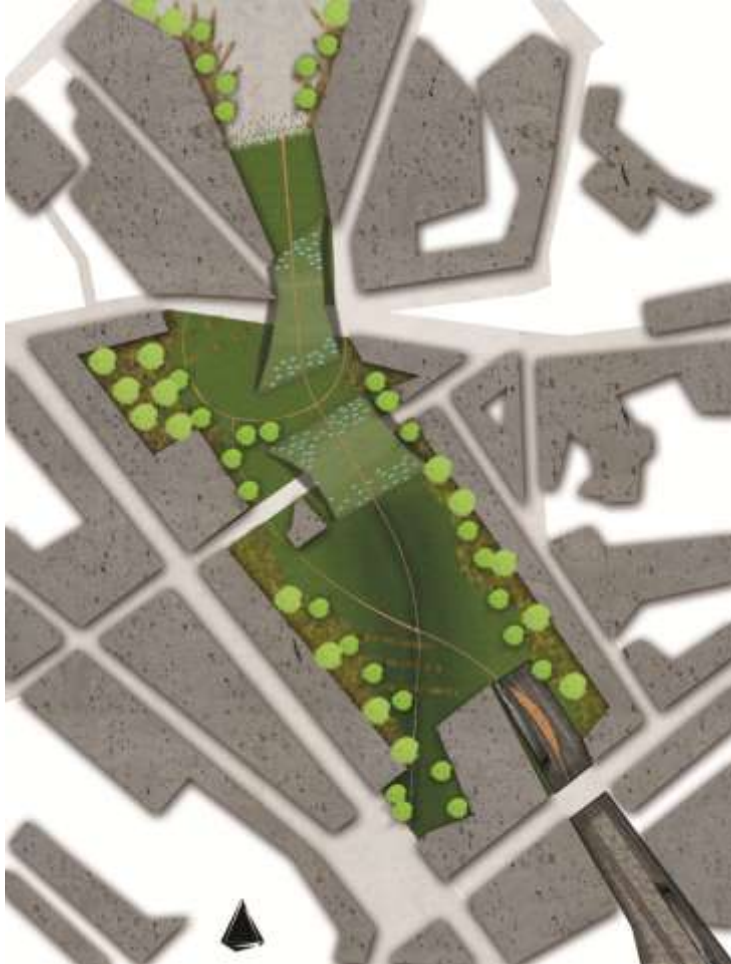

-  Buildings
-  Green area
-  Square
-  Bridge
-  Boulevard
-  Water

Intervention 1: Connecting green spaces through green boulevards

- green pavement
- Trees
- Plants around the Trees
- climbing plants on Strings above the road

Intervention 2a: Connecting the southern area with the EU-area

- Covering the railroad
- pedestrian-circulation
- two green pedestrian bridges
- mirror the valley by vegetation and topography
- soft transition between the pavement and the grass
- human-scale

Simon Verbeeck

Intervention 2b: Connecting the Southern area with the EU-area
